CORE VALUES

DESIGN

Swedish design which is at the cutting edge in function, technology and appearance. Carefully developed, quality-assured products which meet the necessary standards and requirements.

FLEXIBILITY

High technical and functional level. The product's functionality and the accessories available combine to provide an unbeatable versatility and flexibility.

VALUE

Bliz Active's advantageous pricing, along with the flexibility of the products and the accessories which are included in the price or can be purchased separately, provide unbeatable value for consumers.

TECHNICAL ADVANCED SPORTS GLASSES

PROTECT YOUR EYES

Your glasses should not only protect your eyes from dangerous UVA and UVB rays, but they should also protect your eyes against wind, dust, bugs, rain, snow, sleet and anything else that you may encounter. It is therefore important that your sports glasses have both great fit and complete eye coverage. Bliz Active eyewear comes in a multitude of frame sizes allowing a perfect fit option for any, and every face.

STAY IN PLACE COMFORTABLY

Your sport glasses should not move about during your activities. If they do, they could cause irritation on the skin, obstruct vision and worst of all, become a distraction from your sport rather than an aid to your sport. Bliz Active eyewear come with patented click-in slip-proof straps, infinitely adjustable rubber temples and nose pieces. This means that your Bliz eyewear can stay comfortably in the perfect place with no slippage, to only enhance your performance.

UNOBSTRUCTED VISION

For maximal safety and top performance it is important that your glasses do not obstruct your vision and only enhance it. Bliz Active eyewear come in a multitude of frame configurations (and sizes) allowing a perfect fit option for any and every face. Several models come with frameless designs for unobstructed 360 degree vision. Others come with half frames and extra high brows. Bliz also offers an endless amount of interchangeable shades and unbreakable precision lens sets suited to maximize vision in the widest variety of different weather conditions. Bliz Active complies with standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3.

LIGHT WEIGHT

To ensure maximum mobility for the head and minimum tension in the neck, Bliz Active eyewear are superlight often weighing only about 30 g, up to 40% less than other brands.

NANO OPTICS™

PRECISION LENS TECHNOLOGY

New production methods have improved both the number of abilities and the performance of modern lenses. Bliz has developed a unique lens with minimal visual distortion and an integrated anti-fog treatment previously thought impossible. The result is Nano Optics™.

NANO OPTICS™

By combining different materials into one single lens, Nano Optics™ gives you a superb vision with minimal distortion. Nano Optics also has an integrated unique anti-fog treatment that last forever.

Available in three different lens types.

MINIMAL DISTORTION | NANO ANTI-FOG

NANO OPTICS™ - gives you a superb vision with minimal distortion. Nano Optics also has an integrated unique anti-fog treatment that last forever.

EXTREME CONTRAST | MINIMAL DISTORTION | NANO ANTI-FOG

NORDIC LIGHT™ is a unique high tech lens which considerably enhances the contrasts and colors, giving you clear and crisp vision in low light conditions and flat light. The lens removes the blurry colors between the blue and green, and between the green and red wavelengths. These selected colors are blocked by the Nordic Light lens, resulting in a noticeable improvement in contrasts and sharpness even during the toughest weather conditions. Reveal your true environment with Bliz. The lenses come in two options; Coral in Filtcat 1 and Begonia in Filtcat 2.

PHOTOCHROMIC | MINIMAL DISTORTION | NANO ANTI-FOG

THE PHOTOCHROMIC lens keeps you ready for most situations. The lens changes with the weather conditions, from a light filter category 1 lens which is great for night time or cloudy weather, to a dark category 4 lens suitable for sunny conditions.

ONE LENS TO RULE THEM ALL

MINIMAL DISTORTION

Every lens is cut out with perfection and accuracy providing minimized distortion in the field of view.

NANO ANTI-FOG

An integrated unique anti-fog treatment that last forever. Eliminates condensation and moisture on the lens, ensuring optimal fog free visibility in every condition.

HYDROPHOBIC

The hydrophobic coatings keep rain, snow and water drops off the lens.

ANTI-SCRATCH

This drastically reduces the appearance of thin hairline scratches, keeping your lenses in perfect shape longer.

X-PC

Xstreamley tough lenses resists impacts without damaging your eyes.

UV-PROTECTION

The filter blocks harmful UVA- and UVB rays from reaching your eyes.

PHOTOCHROMIC

The lens changes its shading automatically from light to dark and back again based on the weather conditions.

EXTREME CONTRAST

Extreme Contrast for Flat light and bad weather conditions, giving you clearer vision and better performance.

PHOTOCHROMIC

The lens changes its shading automatically and instantly from light to dark and back again based on the weather condition.

NORDIC LIGHT™ - EXTREME CONTRAST

Born and raised in the north. Shaped and molded by harsh and unforgiving environments. Approved by the real natives of Scandinavia. This is what led to the creation of Nordic Light.

Nordic Light is a unique high tech lens which considerably enhances the contrasts and colors, giving you clear and crisp vision in low light conditions and flat light. The lens removes the blurry colors between the blue and green, and between the green and the red wave-lengths.

These selected colors are blocked by the Nordic Light lens, resulting in a noticeable improvement in contrasts and sharpness, even during the toughest weather conditions. Reveal your true environment.

Testing things in laboratory conditions is great. But what does that say about user experience? We have had the world elite in cycling and cross country skiing testing the lenses in the toughest possible environment. After getting their feedback, this is the result. Nordic Light.

Nordic Light

The blurry colors are blocked by the Nordic Light lens, providing the carrier greater contrast and clarity.

Standard lens

Unfiltered and blurry colors.

REMOVE TO IMPROVE

Your eyes are amazing – but not always perfect. It's difficult to distinguish colors between the blue and the green, and the green and the red wavelengths. These crossovers are blocked by the Nordic Light lens, providing the carrier greater contrast and clarity in tough conditions.

DIFFERENT LENSES

BEGONIA- VIOLET

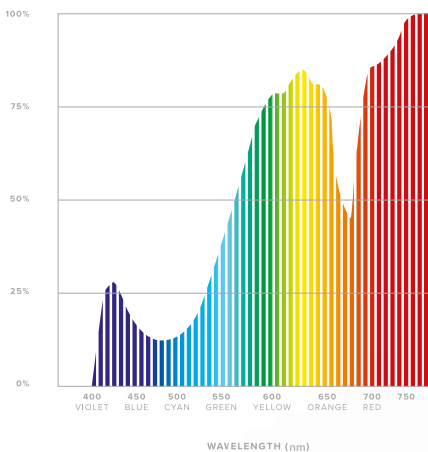

Light transmission: 25-28%
 Category: 2
 Mirror: Blue multicoating
 Hydrophobic & Oleophobic

Innovative allround lens with game changing characteristics. The recipe pops the contrasts and blocks the faded colors in between. The lens is a violet filt.cat 2 lens. It cuts out parts of red light and vastly enhances flat light visibility. Additionally, it also blocks out destructive UV-light.

The filt.cat 2 makes this a great lens in every environment and every weather condition. Glare from the sun is cut by the multi coated color. Compared to the Coral lens, this lens works best in varying weather conditions.

NORDICLIGHT BEGONIA LENS

CORAL - AMBER

Light transmission: 49-51%
 Category: 1
 Mirror: Blue
 Hydrophobic & Oleophobic

Groundbreaking filt.cat 1 lens that enhances contrasts and blocks out destructive UV-light. These lenses cut out the blurry light in between the clear colors. Leaving the clear colors gives your eyes more comfort and better vision. The experience is that your visual perception is boosted and you see contrasts more clearly.

The soft and relaxing amber color gives your eyes the relaxation and contrast needed to keep focused all day long, especially in bad weather conditions.

« BLIZ LENS TECHNOLOGY™

All Bliz Active glasses are equipped with Bliz Lens Technology to deliver precision lens sets of the highest optical standards. The materials and manufacturing techniques are selected to provide maximum safety and clarity, even in the harshest conditions. Whether it's a peaceful morning run through the woods, a daylong bike ride over a mountain pass, or a rapid descent down a snowy Nordic ski trail at sundown, Bliz Active lenses will keep you focused.

All Bliz Active lenses are made with Bliz X-PC, the virtually xtreameley Polycarbonate that complies with standard EN ISO 12312-1, AS/NZS 1067, and ANSI Z80.3 standards for high-mass and high-velocity impact. This state of the art lens material also delivers a 100% filter from harmful UVA and UVB rays.

Additionally, all Bliz lenses are molded with Bliz Perfect Curve Technology™ to provide no breaks or distortions in your visual field.

We offer two lens series' within which come with a multitude of lens shades. Bliz Nano Optics™ is our revolutionary top-end lens type with no distortion and an integrated unique anti-fog treatment that last forever. Bliz Hydro Lens System™ is our traditional model with a high optical quality for a clear vision.

Bliz Lens Technology delivers the highest quality solution for any weather, every light, all terrains, and every speed so you can keep focused on what's ahead.

Bliz Hydro Lens Technology™ is our intermediate lens type. It delivers HYDROPHOBIC features, UV-PROTECTION, X-PC SHATTER PROOF, ANTI SCRATCH and when desired Multicoating or Polarized in one great lens.

Nano Optics Lens - gives you a superb vision with minimal distortion. Nano Optics also has an integrated unique anti-fog treatment that last forever.

Nano Optics - Nordic Light™ is a unique high tech lens which considerably enhances the contrasts and colors, giving you clear and crisp vision in low light conditions and flat light. The lens removes the blurry colors between the blue and green, and between the green and red wavelengths. Resulting in a noticeable improvement in contrasts and sharpness. The lenses come in two options; Coral in Filtcat 1 and Begonia in Filtcat 2.

The Nano Optics - Photochromic lens keeps you ready for most situations. The lens changes with the weather conditions, from a light filter category 1 lens which is great for night time or cloudy weather, to a dark category 4 lens suitable for sunny conditions.

HERO

Winner. Champion. Hero

Here is the result of our combined knowledge - our most advanced model to date. Futuristic design combined with advanced technology. A feather light frame with integrated carbon fiber means that Hero only weighs XX grams. The Nano™ technology packs a ton of qualities into a single lens. Adjustable temple tips and nose pad for a super comfortable fit, and an interchangeable lens making you ready for anything. You can even use an optical adapter adjusted to fit your eyeglasses prescription (purchased separately). Are you someone who goes all in - no matter what activity? Then Hero is the right choice for you.

Technical information

- Integrated carbon
- Nano Optics™ lens
- TR90 core material
- Fits optical adapter
- Adjustable friction rubber nose pad
- Adjustable temple tips in rubber wire core
- Hard protective case with pockets for extra lenses
- Hard case and pouch included

VISION

For your eyes only

If you are serious about your sport, you are serious about your vision. This is why we have developed Vision with you in mind. A model so customizable that you can make it your - only yours. Vision is technically advanced with light weight and Jawbone technology. Nose pad and temples are easily adjusted for superb comfort. The big cylindrical lens has high optical quality and widens your field of view. Additionally, it has extraordinarily efficient ventilation. Vision is equipped with a Hydro Lens Tech™-lens, providing you with clear vision in different weather conditions. As a unique feature you can use an optical adapter that you can have adjusted to fit your eyeglasses prescription (can be purchased separately). Vision is a perfect choice for cycling, skiing and other demanding multisports. A chance to get customized vision suited to your personal conditions!

Technical information

- Optical adapter available, for prescription lenses
- Jawbone Technology and an extra jawbone in different color included
- Including a nosepiece so you can wear it half framed
- Fits normal to wider faces
- Adjustable friction rubber nose pad
- Adjustable temple tips in rubber wire core
- Hydro Lens System™
- Hard protective case

BACKBONE

We've got your back!

Latest technology back protector with fully breathable mesh material and an ergonomically shaped foam liner for close-fitting.

The protector plate is made of a unique material that makes it soft and flexible when you are skiing or cycling, providing a comfortable ride all day long. In case of an accident, the plate stiffens, absorbing the impact for a high level of protection.

The Bliz Backbone protector keeps cyclists and skiers safe both summer and winter times.

Complies with standard EN 1621-2:2014

Technical information

- Very comfortable protector that is soft when you wear it but becomes hard when you hit it
- Removable waistband up and down for great fit to every body
- Extra tail bone protector that is removable
- Stretch material in breathable mesh

ZONAR

One of the toughest challenges a cyclist can face is the wind. Another one is heat. A cycling race can play out in various shapes and scenarios. As a cyclist you need to stay sharp and adaptable at all times, so does your equipment. Zonar is a lightweight helmet with multi purpose design, re-defining aerodynamics. The special shape and adjustable cover either reduces drag when closed or increases airflow by exposing the integrated ventilation channels. Our innovative Bliz AirFlow Vent Technology reduces air resistance when needed, and gives the wearer a nice breeze, creating a perfect climate and keeping your head cool even in hot races.

TECHNICAL FEATURES

- Adjustable ventilation with a movable slider
- Airflow Ventilation System™ Bliz's Airflow Ventilation System was developed using low and high-speed fluid dynamics studies to deliver ideal airflow rates that vary within and around the helmet at every speed. The result is a helmet that delivers pleasant and effective ventilation for increased comfort and safety.
- Reflective logo and details
- Inmould construction, PC shell with EPS Core
- Adjustable strap for perfect fit and increased comfort.
- 2-way size adjustment retention system to adjust the size and position up & down.
- Sunglass dock allows you to quickly and securely stow your sunglasses on your helmet.
- Lightweight

ALPHA

If you need a cool comfort helmet with great performance in every environment. Whether you're on the open road or your favourite single track in the woods - Alpha is the ultimate choice.

Developed with input from World Tour athletes, the Bliz Alpha delivers cool, comfortable protection. Its highly ventilated polycarbonate shell is mated to a lightweight EPS core and adjustable cradle to securely wrap and protect your valuable brain. Our Max -Airflow Ventilation System alters air flows within and around the helmet based on your speed for maximum ventilation and cooling without brain freeze. If you aspire to be a World Tour athlete or just a weekend warrior, the light weight and highly ventilated Bliz Alpha delivers perfect cool comfort and protection in every terrain and environment.

TECHNICAL FEATURES

- Bliz AirFlow System™
- Inmould construction, PC shell with EPS Core
- Adjustable strap for great fit and increased comfort.
- 2-way size adjustment retention system to adjust the size and position up & down.

OMEGA

Omega is a smart everyday cycling helmet design. Combining performance, aerodynamic and light weight with great cooling power for optimal comfort and efficiency in road rides and races.

Developed with input from World Tour athletes, the Bliz Omega delivers high speed comfort and protection. Its aerodynamic polycarbonate shell is mated to a lightweight EPS core and micro adjustable cradle to securely wrap and protect your valuable brain. Our Aero - Airflow Ventilation System alters air flows within and around the helmet based on your speed for crucial ventilation at low speeds yet without unwanted aero drag at high speeds. If you aspire to be a World Tour athlete or just a weekend warrior, the light weight and aerodynamic Bliz Omega allows you to reach your highspeed goals in comfortable protection.
